

I cannot believe that they would do such a thing! That's indisputable. XM Satellite has done a wonderful job and I think it goes hand in hand with the Satellite Dish for TV. I believe that if they do that then they might as well take off the satellite TV's and Cable TV and so forth. They would be directly violating our freedom of the press and speech. Furthermore, XM Satellite is a business, people pay for their services if they dare take anything off or change anything from what we have already then the people won't be getting what they paid for. One of the main reasons people love XM is because of its ability to have everything (multicultural).

Amendment number one, states Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances. This should be strictly followed, if not then what is our government becoming, congress needs to oppose HR 4026!!!!
